Chain React Conference, July 2019 | SeattleJS, April 2019 | APIs & IPAs, February 2019 |
Write/Speak/Code Seattle, January 2019

EXPERIENCE

Front End Developer, Assemble Inc - May 2019 - Present

Assemble Inc is a digital engineering agency with a focus on retail tech and affiliate tools.

Core Technologies: React, Redux, Relay, GraphQL, style libraries like Rebass & Emotion, AWS Amplify & Appsync

- Developed front end interfaces for enterprise clients, using React to create dynamic, performant apps with a focus on thoughtful and intuitive UI/UX.
- Utilized CSS, Sass, and React style libraries to code pixel-perfect implementations of design specs.
- Wrote documentation to help developers quickly onboard onto new projects and technologies.

Co-Organizer, Write/Speak/Code Seattle - April 2019 - Present

Write/Speak/Code promotes the visibility and leadership of technologists with marginalized genders through peer-led professional development.

- Helped build and grow a local community that aims to empower technologists with marginalized genders to thrive as leaders in tech.
- Led peer-mentorship sessions designed to help participants level up their skills and gain visibility in the tech community.
- Assisted with all meetup operations, including event planning, management, and promotion.

Marketing Manager, Formidable, February 2017 - July 2018

Formidable is a Seattle and London-based engineering consultancy and open source software organization specializing in React, React Native, GraphQL, Node.js, and the extended JavaScript ecosystem.

- Managed the Formidable website. Wrote, built, and deployed a variety of content, including technical blog posts, open source releases, social media posts, marketing collateral, and technical case studies.
- Led a full redesign of Formidable.com and re-wrote all website copy to improve company branding. Key pages saw traffic increases of 100 - 200% and bounce rates improved by 30%.

Additional work history available on request.
