WE

PART OF

SOMETHING GREAT

LEVEL UP

Working at Formidable

Formidable is a team of jawdrop experts working together to solve the toughest software problems. We work hard to cultivate a culture of learning, collaboration, and experimentation. We write code in offices and throughout the greater JavaScript community. In addition to the work we do for clients, our team is well known for our contributions to the open source software community, creating software used by everyone from Airbnb to Zillow. If you are a JavaScript professional who understands the importance of work-life balance, you've come to the right place.

WORK HARD. LIVE WELL. LEAVE ON 5.

Highlights

We know there's more to life than work 5 to 5. To support your life outside of the office, we offer 3 weeks of paid time off, unlimited sick leave, 401k with matching, company sponsored medical, dental, & vision insurance, mentoring & parenting leave, a yearly wellness bonus, and a generous bonus program. We know that sometimes life happens, so we offer a collaborative culture, flexible work hours, work-from-home, a well-stocked kitchen, weekly team lunches, and more. We also consider fully remote employment on a case-by-case basis.

Careers

Cloud Architect, Seattle

We are looking for a Cloud Architect to join the Formidable Team. You will help clients build cloud platforms on Amazon Web Services (AWS) using Terraform, Docker, and other production. The cloud landscape is continuously evolving, with new tools and services being released daily. You know how to navigate through the noise and make informed decisions and recommendations that have cost and client needs. You are comfortable leading teams and mentoring engineers in core AWS.

TAKE IT →

Experienced React Engineer, Seattle, Denver, or Phoenix

As a React Engineer at Formidable, you will use a modern JavaScript stack to implement web applications that are fast, accessible, and easy to maintain. You have expert level knowledge of either vanilla Android or native iOS development. You also have professional experience with Node.JS, and have demonstrated that you've been learning how to build apps using modern data-driven component frameworks.

TAKE IT →

Mobile App Engineer, Seattle

We are looking for an experienced Native App Engineer to join the Formidable team. You will build Native Mobile apps that are fast, accessible, and easy to maintain using React Native and Reactive.. You have expert level knowledge of either native Android or native iOS development. You also have professional experience with Node.JS, and have demonstrated that you've been learning how to build apps using modern data-driven component frameworks.

TAKE IT →

Future Senior Software Engineer, Seattle

Formidable is looking for developers who can lead a traditional software development background. We're eager to take on a few talented, but not yet experienced, software engineers to get functional web apps to clients. This role provides on-the job training using real work for real clients with coworkers who are experienced in the technologies we use. Upon completion of the job, you'll be been exploring the modern JavaScript ecosystem like Node, Mongo, Redis, or React Native.

TAKE IT →

Senior Backend NodeJS Engineer, Seattle, Denver, or Phoenix

You are someone who builds production-ready web services using the latest JavaScript tools. You know how to write maintainable code that integrates APIs and can also provide strong documentation and readable code. Ideally, you have demonstrated experience with the latest web application stack, you have a high degree of flexibility in unpackaged and are intimately acquainted with Node.js.

TAKE IT →

Cross-Stack React Engineer, London

As a Cross-Stack React Engineer at Formidable, you will use the modern JavaScript stack to implement the web & mobile applications that are fast, accessible, and easy to maintain and work successfully remotely in the world. You will work closely with client teams, providing project leadership and technical mentorship to ensure successful delivery of client projects. You'll also have the opportunity to work on community-leading open-source projects.

TAKE IT →

React Native Engineer, Seattle, Denver, or Phoenix

We are looking for a React Native engineer with extensive mobile experience to join our Seattle, Denver, or Phoenix office. Ideal candidate has 3+ years experience building responsive user interfaces using React and related libraries (Redux, Reactive, Redux, Immutable, etc). Experience with Cocoa Touch or Android SDK helpful. Candidate should be comfortable with both native and hybrid mobile apps, preferably in React Native.
