

QUALITY SOFTWARE

DONE RIGHT

## Partnering with Formidable

Formidable partners with clients from startups to Fortune 100s to create solutions to the toughest software problems. Focusing on Javascript as our core technology, we utilize React.js, React Native, Node.js, GraphQL, and the extended JavaScript ecosystem to build web apps, mobile apps, cloud services, open source software, and more. Our approach is tailored to each product, so we will always work with your team to select the technologies best suited to your needs. We excel in mobile, web, and cloud platform development and can apply our expertise to your product, no matter where it is in the product lifecycle.

### NEW PRODUCTS

We help clients bring their product concepts to life. Whether you're a startup creating a proof of concept to help with funding, an engineering organization building an MVP and hoping to train your team along the way, or a well-established product group getting ready to build a new web or mobile app, our team of experts can help you achieve your goals.

Formidable's expertise and leadership will help you create a sustainable, maintainable product that your team can carry into the future once our work is done. We will guide you through every step of the process, from determining the best UI/UX setup, to exploring the most effective way to display data to your users, to setting up backend and cloud services that make your product run seamlessly, to establishing best practices, and more.

### EXISTING PRODUCTS

Whether you're looking to modernize your product, transition your team to a new technology, or troubleshoot performance issues, Formidable can help. Our team can audit your product, help identify areas for improvement, select the technologies best suited to advance your product, and implement solutions that help you reach your business and technology goals. Formidable will work closely with you to create lasting solutions and help your teams build the skills they need to maintain and update your product after our work is done.

We understand the common pain points of transitioning to a new technology and can guide you through the entire process, teaching you best practices and helping you understand how to avoid common pitfalls along the way.

### EMBEDDED TEAMS

Formidable offers more than just staff augmentation; when our team of engineers embeds with your engineers, we provide project leadership and technical expertise. We won't just be an extra set of hands- we'll help guide your strategy, enact best practices to ensure a maintainable and sustainable product, and help your team level up along the way.
